To whom it may concern:

Enclosed is a petition filed by the Michigan Agricultural Cooperative Marketing Association (MACMA), an affiliate of Michigan Farm Bureau, on behalf of Michigan apple producers for Trade Adjustment Assistance.

Because apple juice concentrate imports are included in Chapter 20 of the Harmonized Tariff Schedule, and they are also a major factor in the decline of prices, we respectfully request USDA to schedule a hearing on this matter.

If you have any questions, please don't hesitate to contact me at 1-800-292-2653.

Sincerely,

TRADE ADJUSTMENT ASSISTANCE FOR FARMERS (TAAF)
PETITION FOR CERTIFICATION AND ELIGIBILITY FOR A GROUP OF PRODUCERS

NOTE: *The following statement is made in accordance with the Privacy Act of 1974 (5 USC 552a - as amended). The authority for requesting the information identified on this form is 7 CFR Part 1580 and the American Recovery and Reinvestment Act of 2009 (Pub. L. 111-5). The information will be used to determine eligibility for benefits provided by the Trade Adjustment Assistance for Farmers program. The information collected on this form may be disclosed to other Federal, State, Local government agencies, Tribal agencies, and nongovernmental entities that have been authorized access to the information by statute or regulation and/or as described in applicable Routine Uses identified in the System of Records Notice for USDA/FAS/2. Providing the requested information is voluntary. However, failure to furnish the requested information will result in a determination of ineligibility for participation in the Trade Adjustment Assistance for Farmers Program.*

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0551-0040. The time required to complete this information collection is estimated to average 6 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Completed petition may be submitted by fax or emailed or delivered to addresses listed below.

8. Provide one of the following for the most recent marketing year and for each of the 3 preceding marketing years: the average annual price, production quantity, value of production, or cash receipts.

Note: Use Official data if available. The Department's National Agricultural Statistical Service (NASS) has national price data available for many raw agricultural commodities. The information can be found at: www.usda.gov/nass. You must state the source of your data. If you do not use official data, you must provide contact information for verification purposes and supporting documentation to show how your data was calculated or obtained.

9. Source of data entered in Items 8A - 8D: USDA NASS Non-Citrus Fruits & Nuts (MI Price)

10. Basis for request for adjustment assistance. Explain (or attach documentation) how imports have affected your commodity during the most recent marketing year based on at least one of the following measures: price, quantity of production, value of production, or cash receipts. Include any other factors that may also have contributed to lower producer prices below:

Apple prices were reduced by more than 15% of the 3-year average for years 2006-2008. Imports were important in the decline of prices above. Included in this application are all data for apple imports collected by FAS:

| | |
|-----------------------------------|----------------------------------|
| 2008990500 - Apples, PR/PS, NES | 2009790020 - App Ju Cnc Nt Fz |
| 0813300000 - Apples, Dried | 2009790010 - Apple Ju Conc Fz |
| 0808100060 - Apple, Fr > 22Cn/Kg | 2009710000 - App Ju Bx < 20, All |
| 0808100030 - Appl, Fr < = 22Cn/Kg | |

For example, imports of foreign apple juice concentrate continue to plague the US Apple Industry. In 2008, of all the apple juice consumed in the country, 81.7% of the apple juice was made from foreign concentrate. China now produces more than 50% of the total world supply of apples. The US is a major export market for China.

The volume of apple imports has increased. The 2006-2008 3-year average was 2,211,325.6 metric tons; the 2009 imports of apples totaled 2,351,616.9 metric tons or a 6% increase.

Because apple juice concentrate imports are included in Chapter 20 of the Harmonized Tarriff Schedule, and also because it is a major factor in the decline of prices received by growers, we respectfully request USDA to schedule a hearing on this matter.

Notes:

1. Data Source: Department of Commerce, U.S. Census Bureau, Foreign Trade Statistics
2. All zeroes for a data item may show that statistics exist in the other import type, Consumption or General.
3. (*) denotes a country that is a summarization of its component countries.
4. Users should use cautious interpretation on QUANTITY reports using mixed units of measure. Commodity groups on a value report will reflect a total of all statistics for each commodity in the group in DOLLARS, whereas a QUANTITY line item will show statistics on the greatest number of like units of measure for grouped commodities.
5. (I) denotes a country which is summarized into its obsolete country.
